

# Highflex Sanding Pads

Highflex Sanding Pad are a slim, highly flexible pad coated one side with aluminium oxide or silicon carbide grains. Available in five different grit sizes and a variety of foam colours. The grit size can be stencilled on the reverse for ease of identification or we can produce from your own dedicated stencil. They are reusable, washable and long lasting and can be used wet or dry.

The Highflex pad is used extensively in woodworking, autobody repair industries and for sanding the most awkward shapes. They are ideal for rubbing down prior to final varnish, lacquer or paint.

- High flexible
