

Orbital Sanding Pads

Available in sizes to fit most sanding machines, the orbital sanding pad is designed for both the professional and DIY user. The pads are easy to attach to sanding machines and the orbital motion combined with the effectiveness of the pad means that fine and uniform finishes can be obtained quickly. These pads can last up to **ten times as long as ordinary sandpaper.**

- Range of grit sizes
- Easy to attach
- Different sizes made to order

CAUTION: We recommend that a base plate is used between the pad and machine.
